Lab 7 Answer Sheet

Name and Std ID: _Dimitrall_ 053855830_   Lab Section: _1_

Date: _03/22/22_

PRELAB:

Q1. Before you fill in the answers to this prelab make sure that you understand binary arithmentic, especially signed number representation (2's Complement) and overflow in arithmetic addition and subtraction Do the following arithmetic operations and write down the expected sum, carry and overfow:

In case of subtraction, since we are doing a 2's Complement addition Cout is the carryout of the adder.

Binary numbers to add/subtract	Sum	Cout	Overflow
1011 – 0110	0101	1	1
1001 - 0010	0111	1	1
0001 + 0111	1000	1	1
1100 + 0110	0010	0	0
0011 – 1101	0110	0	0
0101 + 1011	0000	0	0

$$\begin{array}{r} \substack{1010x} \\ 1011 \\ +\ 1010 \\ \hline 0101 \end{array} \qquad \begin{array}{r} \substack{1000x} \\ 1001 \\ +1110 \\ \hline 0111 \end{array} \qquad \begin{array}{r} \substack{0000x} \\ 0001 \\ +0111 \\ \hline 1.000 \end{array} \qquad \begin{array}{r} \substack{1000x} \\ 1100 \\ +0110 \\ \hline 0010 \end{array}$$

$$\begin{array}{r} \substack{0011x} \\ 0011 \\ +0011 \\ \hline 0110 \end{array} \qquad \begin{array}{r} \substack{1111x} \\ 0101 \\ +1011 \\ \hline 0000 \end{array}$$

Q2. Complete the truth table for a full adder:

X	Y	Cin	Cout	S
0	0	0	0	0
0	0	1	0	1
0	1	0	0	1
0	1	1	1	0
1	0	0	0	1
1	0	1	1	0
1	1	0	1	0
1	1	1	1	1

Q3. Complete the assignment expressions for S and Cout below:

```
module FA (Cin, X, Y, S, Cout);
input Cin, X, Y;
output Cout, S;
assign S = (expression for S);
assign Cout = (expression for Cout);
```

Expression for S: $(\bar{X} \cdot \bar{Y} \cdot Cin) + (\bar{X} \cdot Y \cdot \overline{Cin}) + (X \cdot \bar{Y} \cdot \overline{Cin}) + (X \cdot Y \cdot Cin)$

Expression for Cout: $(\bar{X} \cdot Y \cdot Cin) + (X \cdot \bar{Y} \cdot Cin) + (X \cdot Y \cdot \overline{Cin}) + (X \cdot Y \cdot Cin)$
